Title : PeopleSoft Campus
Solutions 9 Student
Enrollment Implementation
Essentials

Version : Demo

1. Your client successfully configures the Delegated Access Framework but receives an error when attempting to delegate access as a student to View Personal Information.

What could be causing this error?

- A. The person receiving the delegated access does not have an EMPLID.
- B. The student does not have a relationship with the person receiving the access on the Relationships component.
- C. The student does not have an email address in the system.
- D. The person receiving the delegated access does not have a user ID.
- E. The student does not have any personal information in the system.

Answer: B

2. Your client has a multi-institution setup. Both institutions have a course with the same name, but should be managed separately between the two institutions because the setup between the two is completely different.

What should you do?

- A. Create one course ID with multiple offerings.
- B. Create one course ID with multiple components.
- C. Create two separate course IDs.
- D. Create one course ID and multiple class sections for each institution.
- E. Create one course ID with multiple course attributes.

Answer: C

3. What is the key Academic Structure consideration in determining how the system calculates GPAs?

- A. Campus
- B. Location
- C. Academic Plan
- D. Academic Program
- E. Academic Career

Answer: D

4. Your client wishes to restrict faculty members from entering a W grade for students in the grade roster. How can this be accomplished?

- A. Create a grading scheme that does not contain a W grade and assign it to the course.
- B. In the Schedule of Classes, give the faculty member access to only approve the grade roster.
- C. In the Grade Scheme table, specify that a faculty member cannot grant a W grade.
- D. Create a placeholder grade in the grading scheme that a faculty member can grant until a W is placed administratively.
- E. Instruct faculty members to leave grades blank for students who are likely to earn a W.

Answer: A

5. Your client assigned communications to students a day ago. The next day when they run Communication Generation (CommGen), the communication is not generated successfully. What step should be taken to troubleshoot this error?

- A. Ensure that the client has security access to the communication.

- B. Create a new data source, template, report definition, and letter code.
- C. Make sure that Communication Date Range Selection on the CommGen process reflects the date the communication was assigned.
- D. Assign the communication to the students on a new row.
- E. Run the Reset Communications process.

Answer: E
