Title : Oracle Cloud Platform Data
Integration 2018 Associate

Version : DEMO

1.Which two are correct statements about Oracle Data Integrator work repositories?

- A. They contain data and security information.
- B. They contain data model and project information.
- C. They contain data model and execution information.
- D. They contain project and security information.

Answer: BD

Explanation: https://docs.oracle.com/cd/E17904_01/integrate.1111/e12643/admin_reps.htm#ODIDG154

2.Which component of Oracle Data Integrator (ODI) architecture contains configuration information and metadata?

- A. Run-Time Agents
- B. Repositories
- C. Users
- D. ODI Console

Answer: B

Explanation:

The central component of the architecture is the Oracle Data Integrator Repository. It stores configuration information about the IT infrastructure, metadata of all applications, projects, scenarios, and the execution logs.

https://docs.oracle.com/cd/E21764_01/integrate.1111/e12641/overview.htm#ODIGS421

3.You need to troubleshoot the execution of a Mapping and visualize the data contained In the Oracle Data Integrator (ODI) Staging tables while the Mapping is being executed.

How should you proceed?

- A. Execute the ODI scenario via the Data Integration Platform Console and query the source database.
- B. Use variables In a Package to query the Staging tables and evaluate the variable values.
- C. Modify a KM to dump the staging tables data Into log files to* review.
- D. Start a Mapping In Debug mode using the Get Data feature to view the Staging tables.

Answer: A
