Exam : **ACMP_6.3**

Title : Aruba Certified Mobility
Professional 6.3

Version : DEMO

1.Which of the following Aruba controllers is able to provide IEEE 802.3af? (Choose two)

- A. 3200
- B. 620
- C. 650
- D. 6000 with M3
- E. 7000

Answer: B,C

2.What is the maximum number of remote APs supported by a 3600 controller?

- A. 512
- B. 1024
- C. 128
- D. 256
- E. 2048

Answer: A

3.Which dual radio access point models support concurrent operations in the 2.4Ghz band as well as the 5Ghz band? (Choose three)

- A. AP-92
- B. AP-93
- C. AP-105
- D. AP-224
- E. AP-135

Answer: C,D,E

4.Which of the following APs do NOT support dual radio operations? (Choose two)

- A. AP 93
- B. AP 105
- C. RAP 3WN
- D. AP 224
- E. AP 135

Answer: A,C

5.Centralized licensing is not in use on an Aruba based network which has a Master and three local controllers. No APs terminate on the Master controller. Roles and Firewall policies need to be created and applied, hence PEF-NG license is required

On which controller should the license be installed?

- A. Only the master controller since role and firewall policies are created here.
- B. Only the local controllers since firewall policies are applied here
- C. The master and all three local controllers
- D. This isn't the correct license for this purpose, use PEF-VPN license
- E. This is not needed because PEF-NG is part of base OS

Answer: C

6.What information do you need to generate a feature license key for an Aruba controller?

- A. The controller's MAC address and the feature description.
- B. Controller's MAC address and the certificate number
- C. Controller's Serial Number and the feature description
- D. Controller's Serial Number and the certificate number
- E. Controller's MAC address and Serial Number

Answer: D

7.What are the PEF-NG license limits based on?

- A. Number of APs
- B. One license per controller
- C. Number of users
- D. Number of local controllers
- E. Master Controller total user count

Answer: A

8.Which of the following licenses are consumed by Mesh APs advertising an SSIDs?

- A. AP license
- B. Mesh license
- C. PEF-V license
- D. No license is required
- E. RAP License

Answer: A

9.The permanent licenses on the controller will be deleted with the use of which command?

- A. Delete license
- B. Write erase
- C. Licenses cannot be deleted once activated
- D. Write erase all
- E. Reboot delete all

Answer: D

10.A network administrator wants to terminate VPN sessions on a local controller in the DMZ. Which statement is true about the PEF-VPN license?

- A. It is only applied to the master controller
- B. It is only applied to the DMZ controller.
- C. It is based on the number of APs
- D. One license is needed on the master and the DMZ local
- E. It is distributed by the license server as needed

Answer: D

11.What is the best practice regarding licensing for a backup master to support Master Redundancy in a network without centralized licensing?

- A. Backup master only requires the AP license
- B. Supported limits and installed licenses should be the same on primary master and backup Master

- C. Licenses are pushed from the primary to the backup Master along with the configuration
- D. The Backup Master does not require licenses to support master redundancy
- E. On the backup only one license of each type is needed.

Answer: B

12. Which of the following licenses can be included in the licensing pool for centralized licensing? (Choose three)

- A. Factory default licenses
- B. PEFNG license
- C. Evaluation licenses
- D. RFProtect license
- E. PEFV license

Answer: B,C,D

13. By default Centralized licensing messages between master controllers are sent _____.

- A. In the clear unencrypted
- B. Using CPsec
- C. Using IPsec site to site VPN tunnels
- D. Encrypted using GRE
- E. PAPI

Answer: A

14. Which of the following will occur if a master license server fails with no standby server present? (Choose two)

- A. Local controllers licenses will continue to be valid for 30 days
- B. Local controllers will immediately remove all installed licenses
- C. No licenses will be sent to any new controllers that come online
- D. All licenses go back into the pool for redistribution
- E. A Local Controller elects itself master license server

Answer: A,C

15. Which may be applied directly to a VLAN interface? (Choose three)

- A. Access List (ACL)
- B. Firewall Policy
- C. Roles
- D. AAA profiles
- E. RF Plan Map

Answer: A,B,D

16. When creating a firewall rule on an Aruba controller, which parameter is optional?

- A. Destination
- B. Service
- C. Source
- D. Log

E. Action

Answer: D

17. An administrator creates a WLAN with an unmodified default AAA profile. What is the default role the user is placed in?

- A. default-logon
- B. logon
- C. guest-logon
- D. default-ap
- E. AP-Role

Answer: B

18. What is the first role a user is given when a user associates to an open WLAN?

- A. The guest post authentication role
- B. The initial role in the captive portal profile
- C. The role in the server group profile
- D. The initial role in the AAA profile
- E. The initial role in the 802.1x profile

Answer: D

19. Which of the following could be used to set a user's post-authentication role or VLAN association? (Choose two)

- A. AAA default role for authentication method
- B. Server Derivation Rule
- C. Vendor Specific Attributes
- D. AP Derivation Rule
- E. The Global AAA profile

Answer: B,C

20. Which describe "roles" as used on Aruba Mobility Controllers? (Choose two)

- A. Roles are assigned to users.
- B. Roles are applied to interfaces.
- C. Policies are built from roles.
- D. A user can belong to only one role at a time.
- E. Roles are a set of authentication rules

Answer: A,D
