Higher Quality, Better Service!

## **Q&A**

<http://www.killtest.com>

We offer free update service for one year.

**Exam** : **C2090-611**

**Title** : DB2 10.1 DBA for Linux,  
UNIX, and Windows

**Version** : Demo

1. Due to a hardware failure, it appears that there may be some corruption in database DB\_1 as DB2 is reporting a "bad page". DB2DART is performed for the entire database and it appears that several bad pages were detected in table space TBSP\_1.

What command can be used to recover the database and repair the corruption in table space TBSP\_1?

- A. RESTART DATABASE
- B. RECOVER DATABASE
- C. RESTORE TABLESPACE
- D. ROLLFORWARD DATABASE

**Answer: B**

2. If a single node database is actively being used by applications when a power failure occurs, what method is used to bring the database back to a consistent state once power has been restored.?

- A. Crash recovery
- B. Version recovery
- C. Disaster recovery
- D. Roll-forward recovery

**Answer: A**

3. You have an High Availability and Disaster Recovery (HADR) environment set up and you want to read from the standby database. What must you do?

- A. Assign the value ON to the DB2\_HADR\_ROS registry variable.
- B. Assign the value ON to the DB2\_HADR\_SNAP registry variable.
- C. Execute the STOP HADR command to temporarily break the HADR connection to the standby.
- D. Execute the TAKEOVER HADR command to instruct the standby database to takeover as the new primary database.

**Answer: A**

4. Which command can be used to restore a corrupted database using only the recovery history file?

- A. RESTART DATABASE
- B. RECOVER DATABASE
- C. RESTORE DATABASE
- D. ROLLFORWARD DATABASE

**Answer: B**

5. What is the correct procedure for recovering a dropped table when DROPPED TABLE RECOVERY has been enabled and the database must remain online?

- A. Run the RECOVER DATABASE command with the RECOVER DROPPED TABLE option to restore the database and recover the dropped table.
- B. Run the RECOVER DATABASE command with the RECOVER DROPPED TABLE option to restore the appropriate table space and recover the dropped table.
- C. Restore the database from a backup image that was taken before the table was dropped; run the ROLLFORWARD DATABASE command with the RECOVER DROPPED TABLE option to restore the database and recover the dropped table.
- D. Restore the appropriate table space from a backup image that was taken before the table was dropped;

run the ROLLFORWARD DATABASE command with the RECOVER DROPPED TABLE option to restore the appropriate table space and recover the dropped table.

**Answer: D**

6. Which command will define the alternate diagnostic data directory path as /db2data/db2dump2?

- A. db2set ALT\_DIAGPATH=/db2data/db2dump2
- B. db2set SECONDARY\_DIAGPATH=/db2data/db2dump2
- C. UPDATE DBM CFG USING ALT\_DIAGPATH /db2data/db2dump2
- D. UPDATE DBM CFG USING SECONDARY\_DIAGPATH /db2data/db2dump2

**Answer: C**

7. What is the MAX\_LOG database configuration parameter used for?

- A. To limit how many log files a single transaction can span.
- B. To limit the percentage of primary log space a running transaction can consume.
- C. To limit the total number of primary and secondary log files a database can consume.
- D. To limit the total number of secondary log files a transaction can consume before infinite logging is enabled.

**Answer: B**

8. What unit of measurement is used to represent the cumulative total cost of a node in a Visual Explain access plan diagram?

- A. CPU cycles
- B. Elapsed time, in milliseconds
- C. Processing instructions performed
- D. Timerons

**Answer: D**

9. In IBM Data Studio, where can you schedule script-based jobs?

- A. Job Console
- B. Job Manager
- C. Task Manager
- D. Utilities Console

**Answer: B**

10. The values of the automatic maintenance database configuration parameters for a database named SAMPLE are as follows:

Automatic maintenance	(AUTO_MAINT) = ON
Automatic database backup	(AUTO_DB_BACKUP) = OFF
Automatic table maintenance	(AUTO_TBL_MAINT) = OFF
Automatic runstats	(AUTO_RUNSTATS) = OFF
Real-time statistics	(AUTO_STMT_STATS) = OFF
Statistical views	(AUTO_STATS_VIEWS) = OFF
Automatic sampling	(AUTO_SAMPLING) = OFF
Automatic statistics profiling	(AUTO_STATS_PROF) = OFF
Statistics profile updates	(AUTO_PROF_UPD) = OFF
Automatic reorganization	(AUTO_REORG) = ON

What commands must be run to enable real-time statistics collection on the SAMPLE database?

- A. UPDATE DB CFG FOR sample USING AUTO\_RUNSTATS ON; UPDATE DB CFG FOR sample USING AUTO\_STMT\_STATS ON;
- B. UPDATE DB CFG FOR sample USING AUTO\_TBL\_MAINT ON; UPDATE DB CFG FOR sample USING AUTO\_RUNSTATS ON; UPDATE DB CFG FOR sample USING AUTO\_STMT\_STATS ON;
- C. UPDATE DB CFG FOR sample USING AUTO\_TBL\_MAINT ON; UPDATE DB CFG FOR sample USING AUTO\_RUNSTATS ON; UPDATE DB CFG FOR sample USING AUTO\_STATS\_VIEWS ON;
- D. UPDATE DB CFG FOR sample USING AUTO\_RUNSTATS ON; UPDATE DB CFG FOR sample USING AUTO\_STATS\_VIEWS ON;

**Answer: B**

11.If the current value for self-tuning memory is: Self Tuning Memory (SELF\_TUNING\_MEM) = ON (Inactive)

Which statement is true?

- A. Self-tuning is occurring only on the instance memory area.
- B. The memory tuner is actively tuning the memory on the system.
- C. Self-tuning is not occurring because it is waiting for the database to be recycled.
- D. Self-tuning is not occurring because there are less than two memory consumers enabled.

**Answer: D**

12.What are two types of security label components that can be used with Label-Based Access Control (LBAC)? (Choose two).

- A. Set
- B. Tree
- C. Group
- D. Range
- E. Hierarchy

**Answer: A,B**

13. Where are column mask definitions stored?

- A. In the table definition
- B. In the system catalog
- C. In the table space metadata
- D. In the database configuration file

**Answer: B**

14. Which statement is correct when describing trusted contexts?

- A. A trusted context defines a trust relationship for a connection between the database and an external entity.
- B. A trusted context promotes the authorization level of the connection initiator and grants them DBADM authority.
- C. A trusted context defines a trust relationship between a user and a table allowing that user additional capabilities.
- D. A trusted context gives the database connection the ability to bypass auditing since authentication has already occurred.

**Answer: A**

15. A table named SALES was created as follows:

```
CREATE TABLE sales
(sales_date DATE WITH DEFAULT,
 sales_rep INTEGER,
 sales_amt DECIMAL(12, 2))
```

If management wants to use Label-Based Access Control (LBAC) to protect individual rows in the SALES table, and the security policy needed (SEC\_POLICY) has already been created, what must be done to protect the table as desired?

- A. Associate the SEC\_POLICY security policy with the SALES table.
- B. Add a column with the DB2SECURITYLABEL data type to the SALES table.
- C. Add a column with the DB2SECURITYLABEL data type to the SALES table and then associate the SEC\_POLICY security policy with the table.
- D. Add a SECURED WITH clause to every column in the SALES table and then associate the SEC\_POLICY security policy with the SALES table.

**Answer: C**
