We offer free update service for one year.

Exam : **HP0-J15**

Title : **HP StorageWorks MASE
2088 Delta Exam**

Version : **DEMO**

1. In B-Series virtual fabrics, which feature allows you to access devices in another virtual fabric?

- A: Inter-VSAN Routing
- B: Inter-Fabric Routing
- C: Cross-VSAN Routing
- D: Cross-Fabric Routing

Correct Answers: B

2. How can you improve iSCSI host performance in a SAN?

- A: Upgrade to CommandView 7.
- B: Use NICs with TOE (TCP/IP Offload Engine).
- C: Enable NPIV (N_Port ID Virtualization) support.
- D: Disable SLP (Service Location Protocol) Service Agent.

Correct Answers: B

3. Which tool helps you design a SAN that includes HP Blade servers?

- A: SANsurfer
- B: SAN Visibility
- C: SAN Designer
- D: Blade Designer

Correct Answers: C

4. Which SAN switch management tool, previously only available as an embedded version, is now separately available on CD?

- A: Emulex EZpilot
- B: McData HAFM
- C: Cisco Fabric Manager
- D: Brocade Fabric Watch

Correct Answers: C

5. What are benefits of logical fabrics? (Select three.)

- A: port count reduction
- B: easier administration
- C: fabric service isolation
- D: increased performance
- E: fault propagation minimization
- F: device sharing across logical fabrics

Correct Answers: C, E, F

6. Which tool would you use to quickly survey a SAN environment?

- A: HP SAN Surveyor
- B: HP SAN Designer
- C: HP CommandView
- D: HP SAN Visibility Tool

Correct Answers: D

7. Brocade Secure Fabric OS is running on a fabric with four switches. If you are logged in to one of the switches and change the Admin password, which switch or switches will have the password changed?

A: all the switches

B: LDAP-enabled switches only

C: only the switch you are logged in to

D: only switches connected to the Ethernet

Correct Answers: A

8. Under ideal operating conditions, what is the maximum supported, long-wave transceiver distance with B or C-Series Switches and 4Gb SFPs?

A: 4km

B: 10km

C: 35km

D: 100km

Correct Answers: B

9. Which password authentication service can be used on Brocade switches in addition to the local switch database?

A: NIS

B: LDAP

C: RADIUS

D: Kerberos

Correct Answers: C

10. Where do you find the essential security elements in B-Series Fibre Channel switches running firmware v5.3.x?

A: base Fabric OS

B: Secure Fabric OS

C: ISL Trunking manager

D: switch port web interface

Correct Answers: A

11. A customer decides on HP c-Class BladeSystem as a corporate standard for servers. You must implement SAN integration of the blades into a very large fabric. The customer is concerned about the maximum switch count. Which interconnects will you recommend? (Select two.)

A: QLogic 4Gb Fabric Switch

B: Cisco MDS 9124e Fabric Switch

C: Emulex 4Gb Advanced SAN Switch

D: HP 4Gb Virtual Connect Fibre Channel Module

E: Brocade 4Gb SAN Switch in Access Gateway mode

Correct Answers: D, E

12. A customer wants to replicate data between two sites 200 km apart. Which HP SAN product would you

recommend?

A: MPX 100

B: MPX 110

C: MPR 100

D: MPR 110

Correct Answers: B

13.What is an advantage of iSCSI when compared to Fibre Channel?

A: less protocol overhead

B: no additional customer knowledge required

C: easily provisioned through HP Storage Essentials SRM

D: existing Ethernet infrastructure can be used to create a SAN

Correct Answers: D

14.Which SAN services are provided by the HP StorageWorks 400 Multi-Protocol Router (MPR)? (Select two.)

A:ISL zoning

B:FCIP tunneling

C:IP-IP subnet routing

D:iSCSI-FC translation

E:FC-FC subnet routing

Correct Answers: B, E

15.John, your customer, has a SAN built on B-Series switches. He calls you because he heard about a new feature which allows him to distribute administrator responsibilities among his staff. After research, what is your recommendation to John?

A: Upgrade to Secure Fabric OS version 5.2.

B: Purchase the Advanced Administration license.

C: Implement Distributed Administration through Fabric Manager.

D: Implement Admin Domains available since Fabric OS version 5.2.

Correct Answers: D

16.A customer is expanding a SAN to 400 switch ports, but has limited rack space. Which single Director switch model is recommended?

A: Cisco MDS 9509 Director

B: Cisco MDS 9513 Director

C: HP StorageWorks 4/500 SAN Director

D: HP StorageWorks 4/256 SAN Director

Correct Answers: B

17.You are merging two fabrics and receive a fabric segmentation error that indicates the definition of a zone object in one fabric is different from its definition in the other fabric. What can cause this error?

A: duplicate IDs

B: zone type mismatch

C: zone content mismatch
D: zone configuration mismatch
Correct Answers: C

18.Which application can be used to set up network shares and provision iSCSI storage?

A: Brocade Fabric Manager
B: HP Data Protector Express
C: HP CommandView EVA 7.0
D: HP All-in-One Storage Manager
Correct Answers: D

19.Which zoning enforcement types do Fibre Channel switches provide to protect against unauthorized access? (Select two.)

A:access authorization
B:port-zoning authentication
C:RADIUS server authentication
D:directory access authorization
E:soft-plus zoning by login authentication
Correct Answers: A, E

20.How many drives can be held by the M6412 drive shelf?

A: 8
B: 12
C: 14
D: 16
Correct Answers: B
