Exam : **HP0-M31**

Title : HP Quality Center 10.0
Software

Version : DEMO

1. Click Next or More to continue.

Click the Task button.

Identify the steps for developing the Test Sets Tree and place them in the correct order.

		Steps to Select
1	(place step here)	Review
2	(place step here)	Create Test Sets Folders
3	(place step here)	Create Folders
		Verify
		Add Tests
		Add Review
		Create Test Sets

Identify the steps for creating a Release Tree and place them in the correct order.

Answer:

Identify the steps for developing the Test Sets Tree and place them in the correct order.

Steps to Select

1	Create Test Sets Folders	Review
2	Create Folders	Create Test Sets Folders
3	Add Tests	Create Folders
		Verify
		Add Tests
		Add Review
		Create Test Sets

2. Which products or components integrate with Quality Center? (Select four.)

- A. WinRunner scripts
- B. VuGen scripts
- C. LoadRunner scenarios
- D. QAIInspect
- E. SiteScope
- F. Diagnostic monitors
- G. QuickTest Professional scripts

Answer: ACDG

3. What is an advantage of using cross project customization?

- A. Customizing a template project and applying the customization to Quality Center projects enables you to standardize policies and procedures across projects.
- B. Defining the users who can access the project and determining the types of tasks each user can perform enables you to control access to the project.

C. Defining the users who can log in to the project and specifying the types of tasks each user can perform enables you to control access to the project.

D. Customizing a template instance and applying the customization to Quality Center instances enables you to standardize policies and procedures across instances.

Answer: A

4. Which features are specific to the Premier Edition of Quality Center?

A. synchronize, share libraries, share defects, and cross project customization

B. synchronize, share test sets, share requirements, and cross project customization

C. share libraries, synchronize, share projects, and cross project customization

D. synchronize, share libraries, share defects, and cross instance customization

Answer: A

5. Click Next or More to continue.

Click the Task button.

Place the test management process steps in the correct order.

		Steps
1	(place step here)	plan tests
2	(place step here)	specify releases
3	(place step here)	track defects
4	(place step here)	execute tests
5	(place step here)	specify requirements

Place the test management process steps in the correct order.

Answer:

Place the test management process steps in the correct order.

Steps

1	specify releases	plan tests
2	specify requirements	specify releases
3	plan tests	track defects
4	execute tests	execute tests
5	track defects	specify requirements

Done

6. Which submodule enables you to define releases and cycles?

- A. Management
- B. Libraries
- C. Cycles
- D. Releases

Answer: D

7. The CTO asks you to confirm the version of Quality Center your organization is using. From which toolbar can you access this information?

- A. Tools
- B. About Quality Center Software
- C. Help
- D. HP Support Software

Answer: C

8. What does the Management module address? (Select two.)

- A. libraries
- B. test resources

- C. release models
- D. dashboards
- E. releases

Answer: AE

9. Which types of attachments are allowed in Quality Center?

- A. file, URL, system information, JPG, system attachments
- B. JPG, file, URL, snapshot, TXT, clipboard, system attachments
- C. file, URL, snapshot, system information, clipboard images
- D. file, snapshot, clipboard images, JPG, clipboard snaps

Answer: C

10. Which submodule enables you to check the number of test instances that still need to run?

- A. Cycle
- B. Baseline
- C. Library
- D. Releases

Answer: D

11. Which module enables you to define graphs and reports?

- A. Test Plan
- B. Test Resources
- C. Dashboard
- D. Requirements

Answer: C

12. What does the term severity refer to?

- A. importance level of the defect
- B. impact of the defect on the release goals
- C. impact of the defect on the test set

D. impact of the defect on system operation

Answer: D

13. What should you use to gather and display the information in Quality Center? (Select three.)

- A. external reports and graphs
- B. predefined reports and graphs
- C. document generator
- D. user-defined reports and graphs
- E. custom reports and graphs
- F. custom document generator

Answer: BCE

14. You want to view the child requirements data related to the tests that the requirements cover. Which graph type should you use to accomplish this?

- A. progress graph
- B. trend graph
- C. requirements coverage graph
- D. summary graph

Answer: D

15. Which graph provides a visual overview of all the tests within a folder in the Test Plan Tree?

- A. visual analysis graph
- B. live analysis graph
- C. trend analysis graph
- D. summary graph

Answer: B

16. Your project manager wants to see a list of test instances and the results. Which type of report should you create to accomplish this?

- A. Cross Test Set

- B. Execution
- C. Test Plan
- D. Execution Status

Answer: B

17. You need to generate a report to monitor requirements and test coverage. Which report type should you use to accomplish this? (Select two.)

- A. Standard
- B. Predefined
- C. Non-standard
- D. Non-customized
- E. Custom

Answer: BE

18. What is a release?

- A. a subset of the new features implemented in an application that has undergone a series of test cycles
- B. a set of tests designed for a specific purpose such as new feature functionality, security, and performance
- C. a group of test cycles that has been completed within a specific time period and in which all the high priority defects have been closed
- D. a version of an application representing a group of changes that is available for distribution to customers at the same time

Answer: D

19. What is a cycle?

- A. a subset of the new features implemented in an application that has undergone a series of test cycles
- B. a set of tests designed for a specific purpose such as new feature functionality, security, and performance
- C. a set of development and quality assurance efforts that is performed to achieve a common goal based on the release timeline

D. a version of an application representing a group of changes that is available for distribution to customers at the same time

Answer: C

20. Which requirement type needs to be defined as a custom type?

A. business

B. group

C. functional

D. testing

E. security

Answer: E
