Exam : **HP2-B103**

Title : HP Imaging and Printing
Security - Technical

Version : DEMO

1. Why are job accounting audit trails useful for imaging and printing devices?

- A. They restrict the use of color printing as needed.
- B. They demonstrate that printers are being used.
- C. They demonstrate that regulatory compliance is taking place.
- D. They are used in accountant offices during tax season.

Answer: A

2. Why must the imaging and printing environment be secure?

- A. Most imaging and printing devices are no longer simple network appliances.
- B. Most imaging and printing devices are network appliances and need protection from physical theft.
- C. NIST (National Institute of Standards and Technologies) requires it.
- D. IEEp2600 standards require it.

Answer: A

3. What are components in the HP Imaging and Printing Security framework? (Select four.)

- A. Secure your data.
- B. Secure your printing devices.
- C. Protect your printed documents.
- D. Improve workflow through authenticating network devices.
- E. Reduce network traffic.
- F. Monitor and manage your printing fleet.
- G. Enable print job tracking and accounting.

Answer: A,B,C,D

4. Why is job accounting information gathered and utilized for billing and pay-for-use?
(Select three.)

- A. to aid in installing, configuring and managing printer fleets remotely
- B. to demonstrate that a company is making efforts to protect information
- C. to gather data so it can be encrypted for security reasons
- D. to track network usage and make network telephony changes
- E. to show proof of compliance to regulators
- F. to detect abuse of information sharing and digital communication outside the company
- G. to create an electronic workflow for archiving hard copies

Answer: C,D,F

5. Which competitive advantages does HP offer for security when combined with printing and imaging devices? (Select three.)

- A. HP approaches security holistically.
- B. HP partners with hacker organizations.
- C. HP is the undeniable expert in securing and backing up networked data.
- D. HP Web Jetadmin is the industry leading utility for managing imaging and printing devices.
- E. HP is the undisputed leader in imaging and printing.
- F. HP encrypts all printer data before sending it across a network.

Answer: A,C,E

6.What happens as the result of inconsistent security methods from multiple print vendors in an imaging and printing environment?

- A.There is a reduction in IT spending.
- B.IT departments can easily manage and monitor security across the imaging and printing environment.
- C.Overall system security is weakened.
- D.Companies are forced to be more accountable for how information is managed, shared and archived overtime.

Answer: C

7.What are the advantages of paper-based assets? (Select three.)

- A.easier to carry
- B.easier to create
- C.easier to copy
- D.inexpensive to create
- E.easier to read
- F.easier to work on and make notations
- G.easier to store and retrieve

Answer: C,E,G

8.How can people easily find information on how to hack into unsecured printers?

- A.by searching the Internet
- B.by searching www.hp.com
- C.by searching on the word "hacking" on the NIST website
- D.by using the Microsoft Windows Vista Help menu

Answer: A

9.What does HP leadership in the imaging and printing marketplace help resellers to do?

- A.access a large installed HP customer base
- B.charge higher prices for hardware
- C.empower customers to easily determine which solutions best meet their needs
- D.Keep security issues quiet so customers do not get upset

Answer: C

10.Why imaging and printing security is often not included in internal security standards?

- A.There is a lack of awareness about imaging and printing security.
- B.It is not a risk.
- C.It is expensive to secure.
- D.It is difficult to find information on hacking these devices.

Answer: A
