We offer free update service for one year.

**Exam** : **HP2-N41**

**Title** : Selling HP ArcSight  
Information Security  
Solutions

**Version** : Demo

1.What is the key message about HP's Global security research efforts?

- A. Collaborative effort of HP teams: DV Labs, ArcSight, Fortify, HP Labs
- B. Discovering two times more software vulnerabilities than other IPS, NGFW vendors and continuously finding more than the rest of the market combined
- C. SANS, CERT, NIST, OSVDB, software and reputation vendors contributing information to the ThreatLinQ security portal
- D. Over 2000 customers helping DV Labs collect network and security data from around the globe

**Answer:** A

2.Which disruptive technology trend is relevant to ArcSight?

- A. The decrease in the traditional corporate perimeter
- B. Complexity resulting from removing blind spots
- C. The increased drive to adopt new technologies
- D. The decline of security compliance

**Answer:** A

3.HOTSPOT

Match each enterprise security priority with the action that best corresponds to it.

compliance	<input type="text"/>
information risk in the era of mobile, cloud, and social media	<input type="text"/>
reaction time to security incidents	<input type="text"/>
costs, spending wisely	<input type="text"/>
increasingly sophisticated cyber threats	<input type="text"/>

compliance

- manage
- defend against
- improve
- lower
- achieve
- mitigate
- eliminate
- increase

information risk in the era of mobile, cloud, and social media

- manage
- defend against
- improve
- lower
- achieve
- mitigate
- eliminate
- increase

reaction time to security incidents

- manage
- defend against
- improve
- lower
- achieve
- mitigate
- eliminate
- increase

costs, spending wisely

- manage
- defend against
- improve
- lower
- achieve
- mitigate
- eliminate
- increase

increasingly sophisticated cyber threats

- manage
- defend against
- improve
- lower
- achieve
- mitigate
- eliminate
- increase

**Answer:**

compliance

- manage
- defend against
- improve
- lower
- achieve
- mitigate

#### 4.HOTSPOT

Match each HP Enterprise Security product with its primary function.

Fortify

TippingPoint

ArcSight

Fortify

- network security
- security intelligence
- application security
- fraud detection
- data protection
- threat research

TippingPoint

- network security
- security intelligence
- application security
- fraud detection
- data protection
- threat research

ArcSight

- network security
- security intelligence
- application security
- fraud detection
- data protection
- threat research

**Answer:**

5. Which statements are true about HP ArcSight solution architecture as a platform for monitoring modern threats and risks? (Select three.)

- A. It measures security effectiveness across people, process, and technology.
- B. It includes dynamic analytics and policy enforcement, as well as predictive intelligence.
- C. It accelerates time-to-value for achieving secure applications.
- D. It captures logs, correlates events, monitors applications, checks for fraud, and provides manager uses and controls.
- E. It is augmented by services expertise and the most advanced security user community: Protect724.
- F. It delivers risk intelligence from application development to improve operational security.

**Answer:** A,D,E

6. Enterprises and governments are facing the most aggressive threat environment in their history.

What is the main issue that is causing attacks to be more profound or wide-reaching?

- A. Adversaries have become smarter, better organized, and more persistent as they look to gain information capital and IP.
- B. At any point in time, there are 200-300 potential security vulnerabilities representing thousands of potential ways to be exploited.
- C. Very few technology executives can confidently answer the simple question from their CEO: "How secure is my business?"
- D. Cyber threats are proven to be proliferating much slower.

**Answer: B**

7.What is a benefit of a holistic approach to security?

- A. Decreasing the number of new security breaches
- B. Proactive risk reduction: seeing everything, providing context, and acting appropriately
- C. Increasing the protection of your cloud environment
- D. Firefighting to solve a problem when a breach occurs

**Answer: C**

8.The HP TippingPoint Network Defense System is a complete set of security solutions that does what?

- A. Delivers risk intelligence from application development to improve operational security
- B. Measures security effectiveness across people, process, and technology
- C. Addresses advanced security threats at the perimeter and core of your business
- D. Includes dynamic analytics and policy deployment, as well as zero-day defense
- E. Protects business critical applications from cyber attacks

**Answer: D**

9.Which problems does HP EnterpriseView address?

- A. mines data from across the entire enterprise, including HP Server Automation, HP Network Automation, and HP Operations Orchestration
- B. collects, analyzes, and correlates your servers' data to give you better visibility into your risk
- C. lets customers track their compliance state across their virtualized environments and helps manage their software compliance regulations
- D. provides vulnerability management, asset profiling, risk management

**Answer: D**

10.How does the HP Fortify Software Security Center identify and eliminate risk?

- A. By measuring security effectiveness across people, process, and technology
- B. By including dynamic analytics and policy deployment, as well as predictive intelligence
- C. By addressing advanced security threats at the perimeter and core of your business
- D. By increasing development productivity and improving security by removing security vulnerabilities from software

**Answer: D**
