We offer free update service for one year.

Exam : **JN0-610**

Title : Cloud - Professional
(JNCIP-Cloud)

Version : DEMO

1.Which two features of Kubernetes are supported by the Contrail CNI? (Choose two.)

- A. black list rules
- B. network isolation
- C. service chaining
- D. pod traffic shaping

Answer: A,D

2.Exhibit.

```
apiVersion: v1
kind: Pod
metadata:
  name: test1
  namespace: test
  annotations: {
    "opencontrail.org/isolation" : "true"
  }
...
```

Referring to the exhibit, which two statements are correct when deploying the OpenShift pod? (Choose two.)

- A. A pod is created with the name "test1".
- B. Pods are reachable by pods in a different namespace.
- C. Pods are reachable only by pods in the same namespace.
- D. A pod is created with the name "test".

Answer: B,D

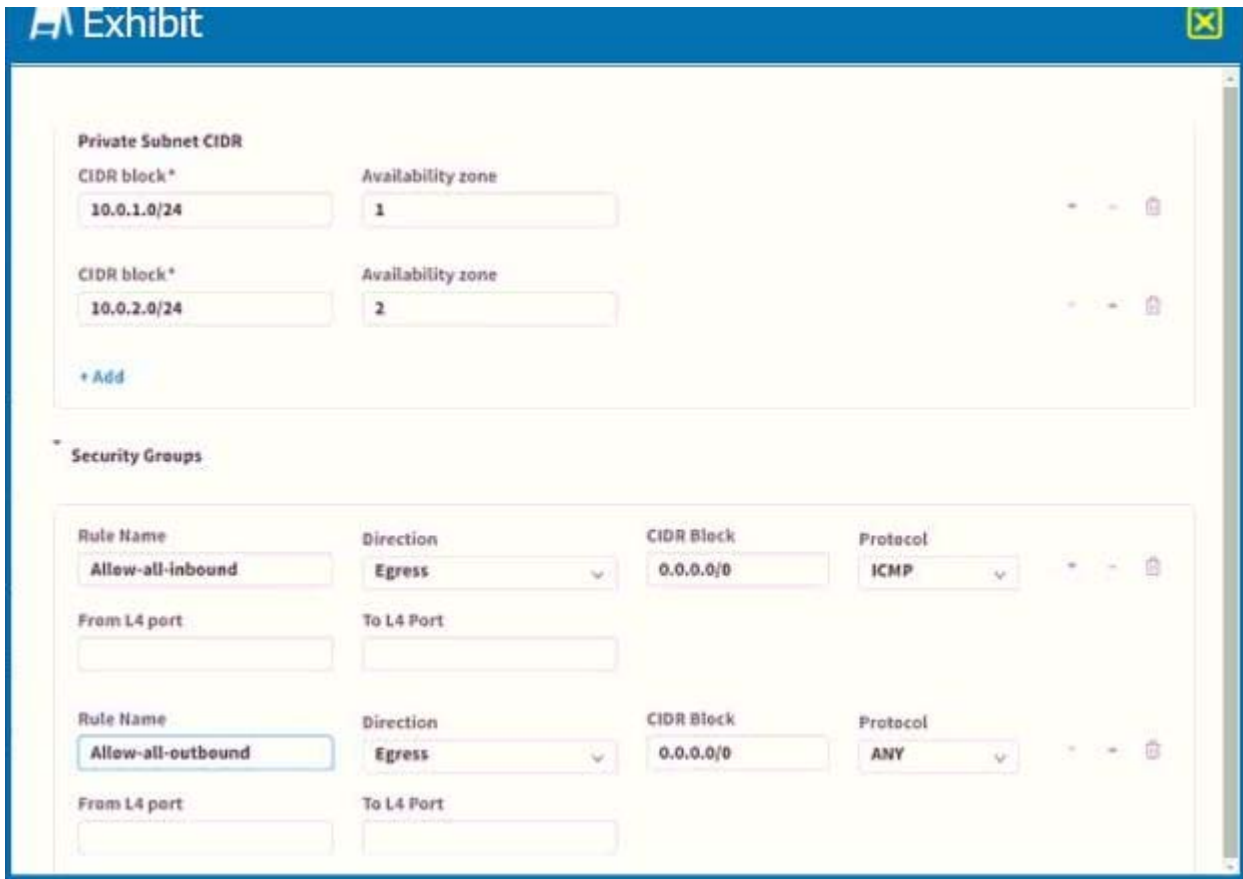

3.You are deploying Contrail Enterprise Multicloud in your environment. You must securely connect your private resources with publicly-hosted resources.

What must be included in this scenario?

- A. AppFormix
- B. Contrail Security
- C. service chaining
- D. Multicloud-Gateway

Answer: D

4.Exhibit.

You are using Contrail Command to configure AWS. You are unable to ping your VMs within the instance you created.

Referring to the exhibit, what is the problem?

- A. You must change the protocols allowed in the "Allow-all-inbound" rule to "ANY".
- B. Your subnets are in different availability zones.
- C. You must change the direction of the "Allow-all-inbound" rule to "Ingress".
- D. Your subnets for "Availability zone 1" and "Availability zone 2" must be the same.

Answer: C

5. Into which namespace are the Contrail system components deployed in an OpenShift cluster?

- A. contrail-system
- B. openshift-sdn
- C. networking
- D. default

Answer: D
