

KillTest

Higher Quality, Better Service!

Q&A

<http://www.killtest.com>

We offer free update service for one year.

Exam : 1D0-181

**Title : CIW Artificial Intelligence
Associate**

Version : DEMO

1.How does 'ensemble learning' enhance machine learning models?

- A. By simplifying the models
- B. By combining multiple models to improve performance
- C. By using a single, highly accurate model
- D. By focusing on visual data only

Answer: B

2.In AI, what is the purpose of 'regularization'?

- A. To keep the AI system running regularly
- B. To prevent overfitting in a model
- C. To regularize the data input speed
- D. To maintain a regular temperature for AI hardware

Answer: B

3.Why is 'data preprocessing' important in AI?

- A. It enhances the appearance of the data
- B. It prepares and cleans the data for analysis
- C. It reduces the cost of data storage
- D. It changes the format of the data

Answer: B

4.What is 'cloud computing' commonly used for in AI?

- A. Physical hardware storage
- B. Printing documents
- C. Increasing data processing and storage capabilities
- D. Manual data entry

Answer: C

5.Which technique is used in AI to process and analyze large sets of text data?

- A. Text Mining
- B. Image Processing
- C. Linear Regression
- D. Hardware Acceleration

Answer: A
