

KillTest

Higher Quality, Better Service!

Q&A

<http://www.killtest.com>

We offer free update service for one year.

Exam : 2V0-11.25

**Title : VMware Cloud Foundation
5.2 Administrator**

Version : DEMO

1.DRAG DROP

Put the following steps in the correct order to optimize resource allocation using Aria Operations.

Navigate to the "Capacity Management" section.	Monitor the environment to ensure optimized resource utilization.	Use the recommendations provided by Aria Operations to reallocate resources.	Select the cluster or resource pool to analyze.	Review the capacity dashboard and identify over- or under-utilized resources.	Log in to Aria Operations.
--	---	--	---	---	----------------------------

Step 1	Step 2	Step 3	Step 4	Step 5	Step 6

Answer:

Navigate to the "Capacity Management" section.	Monitor the environment to ensure optimized resource utilization.	Use the recommendations provided by Aria Operations to reallocate resources.	Select the cluster or resource pool to analyze.	Review the capacity dashboard and identify over- or under-utilized resources.	Log in to Aria Operations.
--	---	--	---	---	----------------------------

Step 1	Step 2	Step 3	Step 4	Step 5	Step 6
Log in to Aria Operations.	Navigate to the "Capacity Management" section.	Select the cluster or resource pool to analyze.	Review the capacity dashboard and identify over- or under-utilized resources.	Use the recommendations provided by Aria Operations to reallocate resources.	Monitor the environment to ensure optimized resource utilization.

2.DRAG DROP

Match each troubleshooting task with its relevant procedure or tool.

Tasks

Procedures/Tools

Setting a host in maintenance mode		Use the Certificate Manager tool
Resolve host connectivity issues		Right-click the host and select "Enter Maintenance Mode"
Resolve certificate issues		Check physical connections and network configuration
Troubleshoot snapshot issues		Check for orphaned snapshots and consolidate if necessary

Answer:

Tasks

Procedures/Tools

Setting a host in maintenance mode	Resolve certificate issues	Use the Certificate Manager tool
Resolve host connectivity issues	Setting a host in maintenance mode	Right-click the host and select "Enter Maintenance Mode"
Resolve certificate issues	Resolve host connectivity issues	Check physical connections and network configuration
Troubleshoot snapshot issues	Troubleshoot snapshot issues	Check for orphaned snapshots and consolidate if necessary

3.DRAG DROP

Arrange the steps in the correct order to generate a performance report in Aria Operations.

Analyze the report for insights on performance, capacity, and utilization.	Log in to Aria Operations.	Navigate to the "Dashboards" section.	Save the dashboard and generate the report.	Select the relevant dashboard or create a new one.	Add the desired performance metrics and widgets to the dashboard.
Step 1	Step 2	Step 3	Step 4	Step 5	Step 6

Answer:

Analyze the report for insights on performance, capacity, and utilization.	Log in to Aria Operations.	Navigate to the "Dashboards" section.	Save the dashboard and generate the report.	Select the relevant dashboard or create a new one.	Add the desired performance metrics and widgets to the dashboard.
Step 1	Step 2	Step 3	Step 4	Step 5	Step 6
Log in to Aria Operations.	Navigate to the "Dashboards" section.	Select the relevant dashboard or create a new one.	Add the desired performance metrics and widgets to the dashboard.	Save the dashboard and generate the report.	Analyze the report for insights on performance, capacity, and utilization.

4.DRAG DROP

Arrange the steps in the correct order to resolve host connectivity issues.

Test connectivity using ping and traceroute.	Review network switch configuration and logs.	Verify the network configuration on the ESXi host.	Check the physical network connections.	Restart the network management services on the host.
--	---	--	---	--

Step 1	Step 2	Step 3	Step 4	Step 5

Answer:

Test connectivity using ping and traceroute.	Review network switch configuration and logs.	Verify the network configuration on the ESXi host.	Check the physical network connections.	Restart the network management services on the host.
--	---	--	---	--

Step 1	Step 2	Step 3	Step 4	Step 5
Check the physical network connections.	Test connectivity using ping and traceroute.	Verify the network configuration on the ESXi host.	Review network switch configuration and logs.	Restart the network management services on the host.

5.DRAG DROP

Match each networking issue with the corresponding troubleshooting step.

Issues

Host in Isolation Response	
Host in Failover State	
Host in Unreachable State	

Troubleshooting Steps

Examine NIC teaming and load balancing configuration

Verify the port group settings and VLAN configuration

Check physical network cables and switch port status

Answer:

Issues

Host in Isolation Response	Host in Isolation Response
Host in Failover State	Host in Failover State
Host in Unreachable State	Host in Unreachable State

Troubleshooting Steps

Examine NIC teaming and load balancing configuration

Verify the port group settings and VLAN configuration

Check physical network cables and switch port status
