**Title : Designing Cisco Application
Centric Infrastructure**

Version : DEMO

1.What is the purpose of access policies in Cisco Application Centric Infrastructure (ACI)?

- A. To control how traffic is permitted or denied within the network
- B. To configure physical connections between devices
- C. To monitor network performance
- D. To manage DNS settings

Answer: A

2.Which of the following is a component of an access policy in ACI?

- A. EIGRP
- B. Contracts
- C. OSPF
- D. VLANs

Answer: B

3.In ACI, what is the purpose of applying a contract to an EPG (Endpoint Group)?

- A. To define VLAN settings
- B. To create access control lists
- C. To specify permitted communication between endpoints
- D. To configure routing protocols

Answer: C

4.Which of the following is true about access policies in ACI?

- A. They are only applied to physical devices
- B. They are used to manage logical components
- C. They are specific to Layer 3 configurations
- D. They do not impact traffic flow within the network

Answer: B

5.How are access policies enforced in ACI?

- A. Through software-defined networking
- B. Through layer 2 switches
- C. Through hardware firewalls
- D. Through the use of Application Network Profiles

Answer: D
