Exam : A00-415

**Title : SAS Viya Fundamentals of
Programming**

Version : DEMO

1.Which CAS action is used to load data from an external file into a CAS table?

- A. cas.load
- B. cas.fetch
- C. cas.upload
- D. cas.import

Answer: D

2.Which CAS action is used to convert a character variable to a numeric variable in a CAS table?

- A. cas.convert
- B. cas.cast
- C. cas.change
- D. cas.transform

Answer: B

3.Which statement is used to sort a SAS dataset in ascending order?

- A. SORT DESCENDING
- B. PROC SORT
- C. ORDER BY
- D. SORT DSN

Answer: B

4.Given the following SAS program?

```
caslib _all_ assign;  
proc sgplot data=casuser.cars;  
vbar Make;  
run;
```

What will the program do?

- A. Produce an error because the SGPLOT procedure cannot access the CAS table.
- B. Execute the SGPLOT procedure on the CAS server.
- C. Summarize the results in CAS and process the summarized results on the Compute Server.
- D. Transfer the data to the Compute Server and then execute the SGPLOT procedure.

Answer: D

5.Which statement is true for the table.copyTable action?

- A. Both the table= and casout= parameters are required to use the copyTable action.
- B. The table= parameter specifies the name of the table that you want to replace.
- C. The table= parameter allows you to create calculated columns.
- D. The casout= parameter is required, but the table= parameter is not required.

Answer: C
