Exam : C_S4CPB_2508

**Title : SAP Certified Associate -
Implementation Consultant -
SAP S/4HANA Cloud Public
Edition**

Version : DEMO

1.Which of the following activities are completed in the Realize phase of the SAP Activate Methodology?

Note: There are 2 correct answers to this question.

- A. Demonstrate where to find business process documentation
- B. Gather perceived change impact feedback
- C. Set up manual test cases in SAP Cloud ALM
- D. Enter configuration values in SAP Central Business Configuration

Answer: C D

Explanation:

In the Realize phase of the SAP Activate Methodology, the project team uses a series of iterations to build and test a complete business and system environment based on the inputs from the previous steps.

The activities in this phase include1:

Receiving the systems from SAP

Performing configuration in the Q-System using SAP Central Business Configuration

Setting up manual test cases in SAP Cloud ALM

Performing data loads and data migration

Delivering key-user training

Preparing for cutover and go-live Therefore, the correct answers are C and D, as they are part of the Realize phase activities.

2.When using the Local SAP S/4HANA Database Schema migration approach, what is the maximum file size? Note: There are 2 correct answers to this question.

- A. 160 MB per ZIP file
- B. 160 MB per file
- C. 100 MB per ZIP file
- D. 100 MB per file

Answer: A B

Explanation:

When using the Local SAP S/4HANA Database Schema migration approach, you can upload multiple XML files at once by using a ZIP file. The total maximum permitted size for the XML files in the ZIP file is 160 MB. The limit for the ZIP file is also 160 MB. Therefore, the maximum file size is 160 MB per ZIP file and 160 MB per file.

3.Which technologies should you use to integrate SAP S/4HANA Cloud Public Edition with another SAP public cloud solution? Note: There are 2 correct answers to this question

- A. SAP Integration Suite
- B. Predelivered APIs
- C. SAP Process Orchestration
- D. SAP Cloud Connector

Answer: A B

Explanation:

To integrate SAP S/4HANA Cloud Public Edition with another SAP public cloud solution, you should use SAP Integration Suite and predelivered APIs. SAP Integration Suite is a cloud-based integration platform that provides a comprehensive set of capabilities to connect applications, data, and processes across different environments. Predelivered APIs are predefined interfaces that enable communication and data exchange between SAP S/4HANA Cloud Public Edition and other SAP public cloud solutions, such as SAP SuccessFactors, SAP Ariba, SAP Fieldglass, and SAP Concur. SAP Process Orchestration and SAP Cloud Connector are not the correct technologies for this scenario, as they are mainly used for integrating SAP S/4HANA Cloud Public Edition with on-premise or hybrid systems.

4. In which SAP Activate methodology phase do consultants configure business processes based on the information gathered in the Fit-to-Standard workshops?

- A. Realize
- B. Explore
- C. Deploy
- D. Prepare

Answer: A

Explanation:

The SAP Activate methodology outlines the phases for implementing SAP S/4HANA Cloud Public Edition. One crucial phase is the 'Explore' phase. During this phase, consultants work closely with the business to understand its processes and requirements through Fit-to-Standard workshops. These workshops are designed to identify the best fit of the standard SAP S/4HANA processes with the business's needs. It's a collaborative effort to explore the capabilities of SAP S/4HANA Cloud and configure the business processes accordingly. This phase is fundamental in ensuring that the solution is tailored to meet the specific needs of the business, setting the foundation for a successful implementation.

5. After integration requirements have been finalized, what is used to analyze, design, and document the integration strategy?

- A. SAP Business Accelerator Hub
- B. SAP Cloud ALM Requirements app
- C. Integration Solution Advisory Methodology
- D. Integration and API List

Answer: C

Explanation:

The Integration Solution Advisory Methodology (ISA-M) is a framework that helps customers and partners to define their integration strategy, design the integration architecture, and document the integration solution. ISA-M covers the entire integration lifecycle, from planning and scoping to testing and deployment. ISA-M is based on best practices and recommendations from SAP and industry experts. ISA-M supports different integration scenarios, such as cloud-to-cloud, cloud-to-on-premise, and hybrid integration. ISA-M also provides tools and templates to facilitate the integration process, such as the Integration Assessment Questionnaire, the Integration Architecture Document, and the Integration Test Plan.
