We offer free update service for one year.

**Exam** : **C\_TSCM66\_66**

**Title** : SAP Certified Application  
Associate - Logistics  
Execution and Warehouse  
Management with SAP ERP  
6.0 EHP6

**Version** : DEMO

1.You want to stage in consistent quantities independently of an order. Which material staging indicator would you use?

- A. Indicator 4 (manual staging)
- B. Indicator 3 (release order part)
- C. Indicator 1 (pick part)
- D. Indicator 2 (crate part)

**Answer: D**

2.What is the purpose of the storage bin field in the "Warehouse Mgmt 2" view of the material master?

- A. To identify the fixed storage bin for that material in the storage type
- B. To identify the next empty storage bin for that material in the storage type
- C. To identify the open storage bin for that material in the storage type
- D. To identify the bulk storage bin for that material in the storage type

**Answer: A**

3.How the determination of door and staging area happens during the outbound delivery?

(Choose three)

- A. It also depends on the route schedule
- B. Staging area determination can also take place at the delivery item level if the storage conditions are also taken into account
- C. The determination can take place at the delivery header level depending on the goods recipient
- D. The determination can take place at the delivery header level depending on the goods issuer

**Answer: B,C,D**

4.There are several documents created during the creation/posting a transaction in SAP.

Which of the following documents are not specific to Logistics Execution?

(Choose three)

- A. Transfer order
- B. Material document
- C. Transfer requirements
- D. Inbound delivery
- E. Purchase Order
- F. Sales order
- G. Outbound delivery

**Answer: B,E,F**

5.What are the things to be taken into consideration for the implementation of RF solution?

(Choose three)

- A. Recovery of connection in case of connection drop and reconnection
- B. Customization and flow logic development in the production environment of SAP
- C. Support for different connection types of RF terminals
- D. Implementation of new devices with ease
- E. Replacement of each screen with our own screen without change of processing logic

**Answer: A,C,E**

6.How the differences handled during the putaway process? (Choose two)

- A. Differences that can be track backed to errors in warehouse are generally putaway in a separate storage bin
- B. The processor who identifies the differences during the putaway process records the missing quantity on confirmation of the transfer requirement
- C. The goods receipt posting has to be corrected with a partial reversal to complete the activity in Inventory Management
- D. If error lies with the vendor the missing quantities can be posted back to the goods receipt area using a separate difference indicator

**Answer:** C,D

7.What are the options available for creation of outbound deliveries? (Choose two)

- A. We can create outbound delivery manually with or without reference to a particular order
- B. We can deliver purchase orders also if we create a delivery manually
- C. We can use collective processing to deliver goods for all types of shipping documents
- D. In collective processing the system automatically creates outbound deliveries in background only

**Answer:** A,C

8.Your goods are stored in different storage sections. What do you do to ensure that goods receipts are stored in the appropriate storage section? (Choose two)

- A. Assign the storage section to the material master data
- B. Activate the storage section check at storage type level and maintain the storage section search table
